Demurrage and Supplemental Services

Demurrage – Our desire is to provide the best rail service possible. The best opportunity we have to achieve this is through efficient use of railway assets, both track and railcars. Railcars that are not moving cause yard congestion, directly impacting the level of service we are able to provide. Therefore, it is imperative that cars are loaded/unloaded as promptly as possible.

This publication provides our daily rates for holding idle rail equipment. We are willing to modify an individual customer’s demurrage policy if the standard amount of free time is insufficient even in a best-case scenario.

For more detail on demurrage and storage charges, please reference our General Tariff, SRY 100 Section 3.

Supplemental Services – Various customer activities and requirements fall outside of the normal handling of railcars. As long as there is no impact to other customers, we are usually willing to accommodate supplemental service requests, however, there is often a cost.

This publication provides a summary of the various supplemental services we are able to provide. For more detail on supplemental services, please reference our General Tariff, SRY 100 Section 3.
