Demurrage and Supplemental Services Rate Schedule

Demurrage – Our desire is to provide the best rail service possible. The best opportunity we have to achieve this is through efficient use of railway assets, both track and railcars. Railcars that are not moving cause yard congestion, directly impacting the level of service we are able to provide. Therefore, it is imperative that cars are loaded/unloaded as promptly as possible.

This publication provides our daily rates for holding idle rail equipment.

For more detail on demurrage and storage charges, please reference our General Tariff, SRY 100 Section 3.
